What is Circular SME Scan about?

CIRCULAR SME SCAN (CSS) connects digitalisation with a circular economy. Circular, sustainable and environment-climate friendly operation of small and medium enterprises (SMEs) results in a competitive advantage and simultaneously contributes to a better environment.

The project started in April 2021 and will run for two years and three months to produce the deliverables which are needed to equip SMEs with circular related materials. The mission of CSS is to upskill SMEs and equip them with useful information & practical materials to apply circularity in their business strategy and contribute to a green economy.

Take the opportunity, visit the platform!
