

## What is Circular SME Scan about?

CIRCULAR SME SCAN (CSS) connects digitalisation with a circular economy. Circular, sustainable and environment-climate friendly operation of small and medium enterprises (SMEs) results in a competitive advantage and simultaneously contributes to a better environment.

The project started in April 2021 and will run for two years to produce the deliverables which are needed to equip SMEs with circular related materials. The mission of CSS is to upskill SMEs and equip them with useful information & practical materials to apply circularity in their business strategy and contribute to a green economy.

### Dear reader,

The CSS project team has some exciting news to share with you! Within the past year, the team has continuously worked on the project and getting the self-scan ready to use. They came together in Athens to discuss how to successfully bring this project to its end.

In this third newsletter, you will be informed about the latest developments in the project as well as an invite to test out the self-scan test.

Read below for further news!

## Athens, Greece

In November 2022, the CSS partnership came together in Athens Greece to discuss the next steps of the project. At this point, the team has made a start to the self-scan. During the previous meeting, the team has set up some indicators as to how the self-scan should be and these indicators were kept in mind while developing it. During the meeting in Athens, steps to bring this self-scan to the finish line was discussed. Delegation of tasks between the partners to make sure the self-scan can be completed in a timely manner.

## Ready, Set, Test!

The self-scan is now ready for testing! We humbly invite you to check it out on our website. The CSS partnership strives to make this project as best as possible so we are always open to your feedback. You can send in your feedback via this [link](#). We look forward to hearing your thoughts!

**More news will follow soon!**
